Тип	3500

h3 (мм)	Q (кг)		
3500	500	400	
3200	600	500	
2900	800	700	
2500	1000	800	

The image shows a technical drawing of a corner bracket. The bracket is L-shaped with a vertical flange on the left and a horizontal flange at the bottom. Both flanges have a thickness of 6 mm. The vertical flange has two mounting holes, each with a diameter of 5 mm. The horizontal flange has a sloped end. The drawing is associated with a table of load capacity (Q) in kg for different heights (h3) in mm. The table shows that as the height increases, the load capacity also increases. The maximum load capacity is 1000 kg for a height of 2500 mm.
